

Read a coordinated drawing

Use this schematic to see how a cabinet reference, drawing revision and site measurement record connect. All dimensions must come from your own project.

SCHEMATIC ONLY / NO PROJECT DIMENSIONS / DO NOT SCALE

ELEVATION / EXAMPLE REFERENCE DR-A

C-A / C-B / C-C: cabinet references. F-A: finish reference. H-A: hardware reference.
These codes are illustrative only. Opening, fixing, service and appliance details need their own coordinated drawings.

Width W	Height H	Depth D	Unit basis
			mm / in:

DRAWING CONTROL / COMPLETE FOR YOUR PROJECT

Drawing reference	Revision	Site check by (role)	Check date

- ☐ Record the finished floor / wall basis.
- ☐ Keep site measurements and order dimensions distinct.
- ☐ Confirm the dimension units across every sheet.
- ☐ Resolve open details before production release.

Match the specification sheets

Use the same references on the drawing and in the schedules. The codes below show the relationship; no material, brand, size or quantity has been selected.

EXAMPLE REFERENCES / PROJECT SPECIFICATIONS LEFT BLANK

Example ref.	Schedule item	Information to enter for your project	Status
C-A	Cabinet / dimensions	W, H, D; unit basis; site-check record; matching drawing revision.	To confirm
B-A	Cabinet body	Board type, thickness, internal finish and relevant exposure conditions.	To confirm
F-A	Visible finish / edge	Finish name, sample reference, visible faces and agreed edge treatment.	To confirm
H-A	Hardware	Brand / model, opening method, position and included accessories.	To confirm
A-A	Other-trade interfaces	Appliance / sink drawings, openings, services and required clearances.	To confirm
Q-A	Supply scope	Room / unit list, quantities, included items and exclusions.	To confirm

SAMPLE AND APPROVAL RECORD

Field	Your project record
Sample / finish reference	
Drawing and schedule revision	
Open question / responsible role	
Review outcome / date	

A reference photograph or concept image does not define the substrate, finish performance or hardware supply. Record the agreed specification and keep substitutions visible as revisions.

Connect rooms to packages

A room, cabinet, approved drawing revision and package need a shared reference. This worksheet illustrates that mapping and leaves the actual order information blank.

R-A / C-A / DR-A / P-A ARE FICTIONAL REFERENCE CODES

BEFORE RELEASE / AGREE THE RECORD

- ☐ Final dimensions and drawing revision
- ☐ Product list and quantities
- ☐ Finish samples and hardware references
- ☐ Supply scope, exclusions and quotation
- ☐ Room / package identification method
- ☐ Outstanding questions and responsible roles

Use package labels, component counts and photographs to record visible damage or shortages. Confirm the applicable receipt and installation checks for your product and site.
